Continuous Professional Learning

Earn the globally recognized Certified Ethical Hacker (C|EH®) Credential

Part-Time Online

Master ethical hacking skills that go beyond the certification.

Comprehensive industry-relevant training for career advancement

The 12th version of C|EH® offers the most comprehensive ethical hacking program with training, practice and certification all integrated into one micro-credential. This unique certification provides extensive practical training, labs and assessment to ensure that learners are proficient with the most in-demand skills for the industry.

Features:

- Over 220 hands-on labs with competition flags

- 3000+ Student Manual Pages

- 1900+ Pages of Lab Manual

- Hands-on program with 50% of training time dedicated to labs

- 3500+ Hacking and Security Tools

Learn from expert faculty

Taught by faculty that are highly skilled educators and industry professionals. This experience will provide the opportunity to learn the latest hacking tools and includes the four-hour exam which is recognized across the globe as the original and most trusted tactical cyber security certification for ethical hackers. Become a Certified Ethical Hacker (C|EH®) to prove your skills and advance your career.

Gain in-demand skills on an accelerated timeline

- 20 modules within 12 weeks

- Learn how to hack multiple operating systems (Windows 11, Windows servers, Linux, Ubuntu, Android)

- Become certified with the ANSI accredited exam taken at Humber College
